

New software manages your contacts easily

If you feel your contacts can be managed better, you are right. Sunnysoft Contacts are here to help.

Praha, 25th July 2007 – Sunnysoft is launching new software for PDAs on Windows Mobile. Sunnysoft Contacts application brings a lot of functions the default system contacts really are missing.

The application has elaborate graphic interface with many possibilities for user settings. Among clever functions Sunnysoft has come with belong for example integration of so called 'quick buttons' ; these help manage contacts more quickly, it is also possible to save phone numbers directly and more effectively. Contact history is another issue developers have carefully thought of. User is able to look up information about calls made and received, SMS, MMS and emails. Clever keyboard, which is also part of the application supports searching latin characters, dicritics, Greek alphabet, Hebrew and Russian characters. „These are only few functions our new application can do for you “, adds Ing. Jaroslav Prchal, development director.

More information about new product can be found here <http://www.sunnysoft.com>
